SUMMARY

Aspiring software engineer with strong fundamentals of OOP languages (C/C++), data structures, algorithms, problem solving along with expertise in full-stack web development. Having hands-on experience with MERN stack projects and APIs. Actively participating in coding contests. Exploring cloud computing platforms.

EDUCATION

Jaypee Institute of Information Technology

Noida, India

B.Tech. in Electronics and Communication Engineering

Sept 2022- May 2026

CGPA: 8.8/10

EXPERIENCE

ML Intern

Jun 2025- Jul 2025

Edunet Foundation

Remote

- Developed a solution to predict employee salary based on the parameters provided using machine learning models.
- Models used were – Logistic Regression, Random Forrest and XGBoost.
- Deployed the project in the form of a web application using Streamlit for a small database.
- Technical skills: Python, Pandas, Numpy, Sci-kit learn, Matplotlib, Streamlit

PROJECTS

CollabDocs

[GitHub](#)

- Developed a collaborative document editing platform wherein multiple users can edit a single document at the same time. Users can create their own accounts, store the documents, export them into PDF or docx format and share the document.
- Implemented WebSocket-based bidirectional communication for instant content updates across users, reducing latency to <100ms.
- Deployed the application using AWS Amplify for the frontend, Render for the backend and MongoDB Atlas for database.
- Technology used: React.js, Node.js, Express.js, MongoDB, HTML, CSS

QuickLink – URL Shortener

[GitHub](#)

- Developed a URL shortener which shortens any lengthy URL by designating a 6-digit code to the link.
- Developed a RESTful API with Express.js featuring 4 endpoints. Uses NoSQL database to store the data. Reduces URL length by 70%-80% on average, improving shareability across the internet.
- Deployed the application using AWS Amplify for the frontend, Render for the backend server and MongoDB Atlas for database. It is an open source application and can be deployed by anyone on their website.
- Technology used: React.js, Express.js, Node.js, MongoDB

Is My Resume Compatible?

[GitHub](#)

- Developed a resume-job compatibility checker which parses the resume and the job link for keywords and then checks for same keywords in the resume as well as the job description.
- Implemented cross-origin resource sharing (CORS) and secure API endpoints. Integrated frontend with backend RESTful API using Fetch API, handling asynchronous requests and errors.
- Deployed the application using AWS Amplify for the frontend, AWS Lambda and API Gateway for the backend having 99.9% uptime and sub 3-seconds response time.
- Technology used: React.js, Node.js, Express.js, HTML, CSS

ACHIEVEMENTS

Codeforces Rating – Max. 935

[Link](#)

- Competitive programming profile on Codeforces with a maximum rating of 935 (newbie)

Leetcode 50 Days Badge

[Link](#)

- Badge granted for being among the top 6.9% of Leetcoders

TECHNICAL SKILLS

Programming Languages: C, C++, Python, JavaScript

Web Development: React.js, Node.js, Express.js, HTML, CSS, Bootstrap, Vite

Databases & APIs: MySQL, MongoDB, RESTful API, FastAPI

Developer Tools: Git, GitHub, Docker, AWS, Postman, VS Code, NPM, Yarn, PNPM

Data Science: Pandas, NumPy, Scikit-Learn, TensorFlow, Matplotlib, Streamlit
